
Guidance 3x Guidance for External Assessors when considering the validation of a programme at an overseas campus

When asking an External Assessor to consider the validation of an existing programme to run at an overseas campus, the External Assessor should bear in mind that the programme has already been validated to run in London and should therefore only consider the following points:

- Are the physical and learning resources appropriate and available?
- Are there student support mechanisms in place?
- Is the curriculum appropriate for the location of delivery (i.e. not focused on the UK)?
- What is the relationship with the programme and staff at Hendon?
