

Pathways to Inclusive Entrepreneurship and Growth

The nature of businesses, the ways in which they operate and their geography have changed substantially. We have seen a steep rise in microbusinesses and the sharing economy. At the same time, high streets are struggling in some towns and cities. This seminar will discuss how can we create inclusive growth in a fast changing economy, and how can economic development reach new types of businesses and entrepreneurial activity?

Doing business and creating growth in a digital economy Antony Walker, Deputy CEO of techUK

Sharing Economy – the third industrial revolution? / Robin Teigland, Associate Professor at the Centre for Strategy and Competitiveness, Stockholm School of Economics

Entrepreneurship Policy in Germany Michael Fritsch, Professor in Business Dynamics, Innovation and Economic Change, Friedrich-Schiller-Universität Jena
